Continuation of Substance of Interview including description of the general nature of what was discussed: An examiner's amendment to the after final amendment of 12/8/05 was proposed, where in claims 57, 77 & 90 in the last or 2nd to last line, "an" would be deleted, such that it would be clear that all of the opposed surface area of the object is being referred to. In claim 95, line 9, "," would be changed to --in--, consistent with the suggestion in the 9/8/2005 action & because the present phrasing of the after final of 12/8/05 is fragmentary, decreasing the clarity of where the active oxygen is being generated. These changes were agreed to & will be made by Examiner's Amendment.

Also, claim 58 has been superceded by the amendments to independent claim 57, hence it needs to be either deleted or amended to be consistent with changes in the independent claim. On 12/16/2005, claim 58 was further discussed with Mr. Garlepp, who is checking with the applicants to find out what how they wish to precede with respect to this claim.
